|    | Assessment criteria*   | Rating scale ( 0 to 5) |
|----|--|------------------------|
| 1  | Significance, relevance to the area of finance and financial law.                            |                        |
| 2  | Compatibility of the subject with the Journal's profile.                                     |                        |
| 3  | Correctness of the article's structure (clarity, cohesion).                                  |                        |
| 4  | Correctness of the objectives and hypotheses.  |                        |
| 5  | Quality of theoretical argument (terminology).   |                        |
| 6  | Methodological standards (are the applied methods adequate to the problem, conclusions).     |                        |
| 7  | Empirical orientation of the text (selection and presentation of empirical examples).        |                        |
| 8  | Practical applicability.   |                        |
| 9  | Editorial correctness (summary, tables, graphs and footnotes).                               |                        |
| 10 | Linguistic correctness (style, grammar, punctuation ).                                       |                        |
| 11 | Objectives (properly achieved), interpretation of the results, justification of conclusions. |                        |
| 12 | Selection and use of sources (number and quality of sources).                                |                        |
|    | Total number of points   |                        |

<sup>\*</sup>Please supply justification of the assessment (particularly low) on the next page.
